

## Sennco has the solution for you

Sennco Solutions takes the time to understand your need and to determine the type of solution that will best fit your need. If the best solution is within our inventory, we'll manufacture it under quality-controlled conditions and ensure a well-manufactured product in a timely manner. If the best solution is not in our existing inventory, we invest in the proper research and development to design a solution that works best for your situation.

We work hard daily to bring new ideas in design, manufacturing, delivery and pricing to our customers. We consider ourselves a value-added vendor that thinks outside the box and is willing to earn your business.

# Self-Alarms for Retail Products

Sennco Solutions offers a complete line of alarmed tethering solutions for securing virtually any type of item offered at retail.

Our versatile S-Tags are self-alarmed units that alarm not only if product tampering occurs, but will also alarm at your EAS secured entrance. S-Tags are available in two options; adhesive and tethering. The adhesive version applies directly to your product or product packaging. The tether version threads through an opening on the product and secures within itself to conform to nearly any product design. A visual LED Indicator alerts potential thieves and store associates that the alarm is operating and acts as an additional visual deterrent to theft.

S-Tag Sensor with Remote

## The Teathered S-Tag:

## The Adhesive S-Tag:

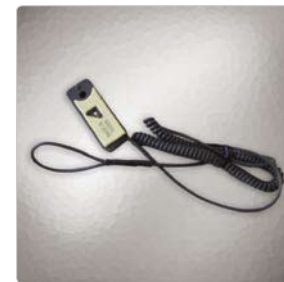

## S-Tag Options:

**Retractable Self-Alarms** allow you to alarm individual items while keeping the cable out-of-site. The alarm features a 1 1/2" x 1/2" adhesive/plunger sensor that emits 80 dB.

**The Dual Alarm** features 8 feet of heavy-duty coiled cable with an alarm at each end. Each alarm emits 80 dB ensuring that no one walks off with your demo product AND the security.

**Light Duty Option 1** Variations of lighter duty individual alarms are also available. The Light Duty Alarm with coiled cable and loop end.

**Light Duty Option 2** Light Duty Alarm with coiled cable and adhesive end.

\* Battery Operated.

**The 110 dB Alarm** Sennco's 110 dB alarm is an adhering self-alarm that is compatible with your EAS system that meets your alarming needs for medium to large items.

**Our Polycarbonate Sennco Security Cases** maintain a tight control over your inventory by securing product in a protective cover that works with your EAS system and an external adhered alarm. Our cases offer an unobstructed view of the product, making it easier for the customer to make a purchasing decision.
